

Reflective beanies

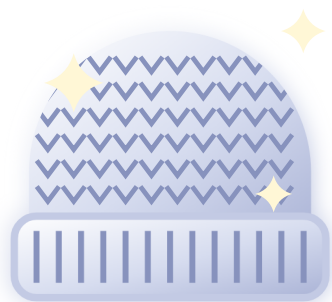

Winter beanies with certified reflective yarn – in the knit, the pattern, the patch or the pompom.

01

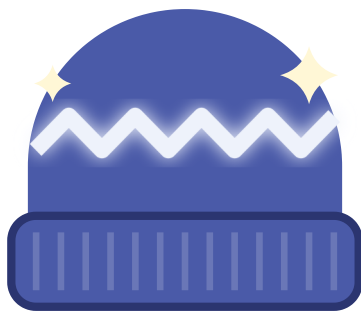

Where the reflective yarn goes

We place reflective yarn in one or several parts of the beanie, depending on how visible it should be.

In the knit structure

Reflective yarn knitted into the whole beanie – it subtly reflects light and improves visibility.

In part of the pattern

A stripe, symbol or chosen design element made from reflective yarn.

On the patch

The logo on a patch as a reflective accent – printed or stitched with reflective thread.

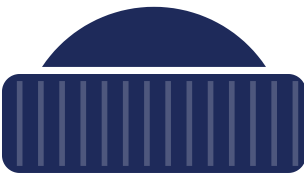

In the pompom

A pompom with reflective yarn – a small detail that changes the character of the beanie.

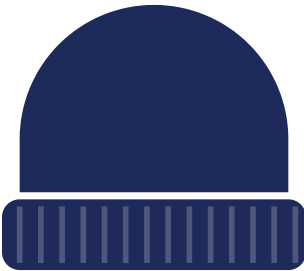

02

Style

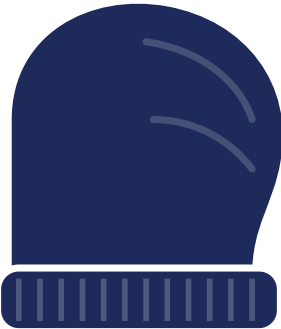

Eight proven cuts. We can also make a beanie to your own design.

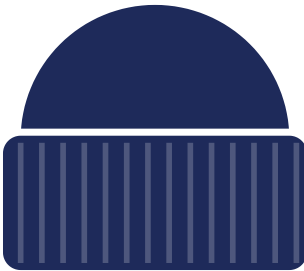

Fisherman (short)

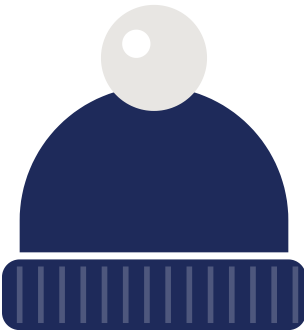

Standard (medium)

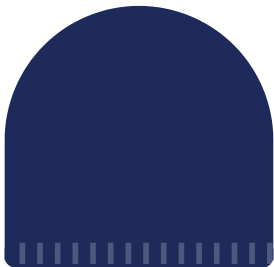

Slouchy (long)

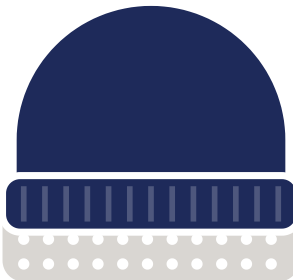

Cuffed

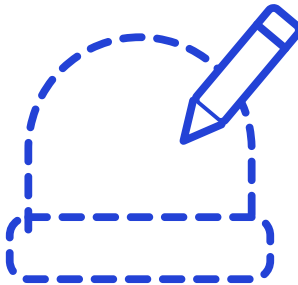

With pompom

No cuff

Fleece-lined

Custom style

Describe your idea in your enquiry.

03

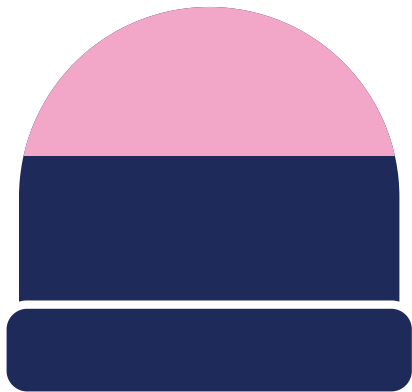

Colours and pattern

A beanie can have one to four yarn colours or any pattern knitted into the fabric, including lettering or a logo.

1 colour

A single-colour beanie.

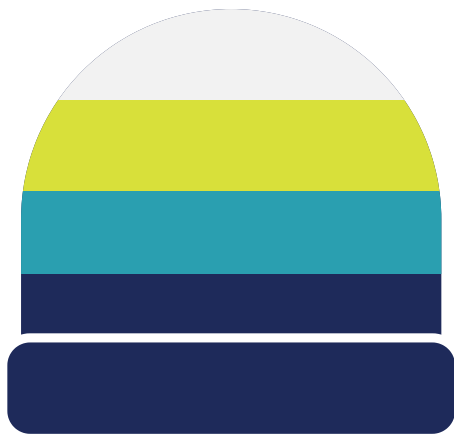

2 colours

E.g. stripes or a contrasting cuff.

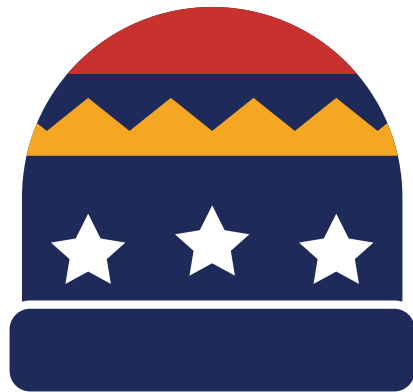

3 colours

Three stripes or a simple motif.

4 colours

The most pattern options.

Custom pattern

Lettering, a logo or a motif knitted into the fabric.

04

Branding

Choose how your brand will appear on the beanie.

No branding

Logo label

Sewn into the cuff seam.

Embroidered patch

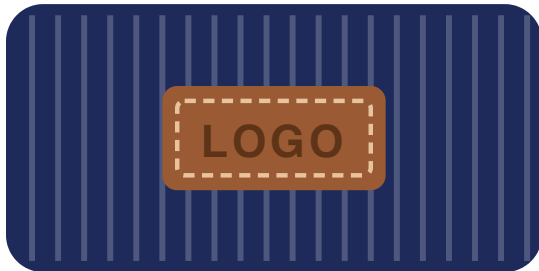

Sublimation patch

Full colour, including photos and gradients.

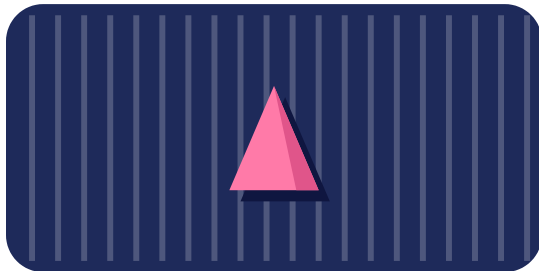

Sublimation patch with reflective edge

Reflective border – visible after dark.

Leather patch

Logo embossed in leather.

3D logo

A raised 3D-printed element.

Direct embroidery

Logo embroidered onto the knit.

05

Material and stitch

The material and stitch type affect the look, warmth and durability of the beanie.
